## DECLARATION BY ALEXANDER SHOCKS ALLIES

Says He Will Carry Out the Policy of Deposed Constantine.

MAY BE DETHRONED

Entente Press Calls for Drastic Action to Retain Control.

VENEZUELOS ONLY HOPE

Statesman Likely to Become Supreme Power in Greece Capital.

Special Cable Despatch to The Sun.  
LONDON, June 18.—The publication of the proclamation of the new King Alexander of Greece comes as a shock to the Entente. The new and youthful monarch pledges himself to carry out the brilliant policy of his father, the notoriously pro-German Constantine, and uses the language of an absolute monarch.  
The press of the allied nations demands if it has been hounded and if another German diplomatic trick has succeeded in the Balkans. There is a universal demand that if King Alexander attempts to follow any such course as to Constantine he be instantly deposed without ceremony; that the Allies take direct control of the country, establish Venizelos in power and keep him there by force if necessary.

## VENEZUELOS AS PREMIER.

London "Times" Says Chamber of 1915 Will Be Convened.

Special Cable Despatch to The Sun from the London Times.

LONDON, June 18.—The Times predicts today that M. Venizelos will return soon to Athens as Prime Minister of Greece under the new King Alexander. The Times says:

"We believe the following are the general lines of the policy at present contemplated by M. Venizelos: The new King Alexander must annul the dissolution of the Greek Chamber of Deputies in November, 1915, by Constantine, which illegal act was one reason for the de-thronement of Constantine. That Chamber, legally elected in June, 1915, should be reconvened. The new King Alexander, as chief of the parliamentary majority, Venizelos should be called to power to apply the national policy so disastrously interrupted by the German Chamber. The new King Alexander, as chief of the parliamentary majority, Venizelos should be called to power to apply the national policy so disastrously interrupted by the German Chamber. The new King Alexander, as chief of the parliamentary majority, Venizelos should be called to power to apply the national policy so disastrously interrupted by the German Chamber."

"The project of immediate fresh elections must be set aside for the present. Although an appeal to the country undoubtedly would result favorably to the Venizelist Liberal party it would present a most serious and dangerous difficulty. When the Venizelos government is formed, the Venizelos Liberal party it would present a most serious and dangerous difficulty. When the Venizelos government is formed, the Venizelos Liberal party it would present a most serious and dangerous difficulty. When the Venizelos government is formed, the Venizelos Liberal party it would present a most serious and dangerous difficulty."

"The Venizelos government is formed, the Venizelos Liberal party it would present a most serious and dangerous difficulty. When the Venizelos government is formed, the Venizelos Liberal party it would present a most serious and dangerous difficulty. When the Venizelos government is formed, the Venizelos Liberal party it would present a most serious and dangerous difficulty. When the Venizelos government is formed, the Venizelos Liberal party it would present a most serious and dangerous difficulty."

## Germany Is Facing Failure of Crops.

Special Cable Despatch to The Sun.

LONDON, June 18.—Despatches from Amsterdam say that the Dutch newspaper *Rijdsche Schiedamsche*, which throughout the war has been well informed on German matters, prints an article on the crop outlook in Germany, predicting almost complete crop failure.

The newspaper declares that the yield this year will be far less than Germany ever knew. It explains that an unprecedentedly long drought in Germany is continuing. The drought has ruined the grass and greatly reduced the possible yield of grains and vegetables even if normal conditions prevailed.

The article says conditions are worse than ever before because the farming is done largely by women and prisoners, and the ploughing shallow and poorly done. Commercial fertilizers are lacking entirely, and natural fertilizers are proving worthless because the live stock was fed improperly. The sowing too was late, partly because of the late spring, partly because of the lack of labor, and it was badly done because of the unskilled labor. In northern Prussia the sowing has not commenced, which is equivalent to assurance that there will be almost no crop. In many provinces the grass is entirely without seed, an important vegetable, are devastated by weeds, insects and drought.

## BAKER TO ASK \$600,000,000 FOR AIR FLEET

Speed Motor Designed Combining Leading Features of Foreign Makes.

AUTOMOBILE MEN TO AID

Rear Admiral Peary Renews Plea for Quick Rule of Skies.

WASHINGTON, June 18.—A new American airplane engine, developed from the most efficient air fighting engines in use by our Allies, will be the basis of the mammoth aerial fleet which this Government will construct as rapidly as machines can be turned out and pilots trained to operate them. The new engine has been designed in large part by Howard Coffin of the advisory commission of the Council of National Defense and is being developed under the leadership of Rear Admiral Peary.

The plan for the construction of \$600,000,000 for the construction of tremendous aerial fleets in this country have been in the making for months. They have been formally put up for the approval of the War Department until the engineers felt confident that they could present to the country an airplane engine capable of coping with the highest development of that art abroad. The cooperation of foreign war offices was obtained and plans and designs of French, British and Italian fighting airplanes and engines were studied. Mr. Coffin himself one of the leading automobile engineers of the country.

His Plan Is Indorsed.  
Starting from this point and enlisting the most advanced automobile and engine designers, Mr. Coffin progressed to a point where it was deemed safe to present the matter to Secretary Baker and the army chiefs. After carefully going over the plans the Secretary and Gen. Squier, Chief Signal Officer, enthusiastically placed the weight of their support behind the project and determined to ask an appropriation of \$600,000,000 for the work.

The Bureau of Standards is now engaged in standardizing the machinery and patterns which will be used in turning the engines out in tremendous quantities. The largest automobile factories in the country probably will be used, and so largely will their facilities be utilized, according to one authority, that the output of pleasure cars in this country may be materially curtailed.

The appearance of Rear Admiral Peary before the Sheppard subcommittee of the Senate Committee on Military Affairs today, in simple terms, was a renewal of his plea for quick, earnest and thorough action looking to establishment of the United States as the undeniably superior air fighting nation.

"In God's name," said Peary, "why not take the initiative and lead? Why be pushed into every movement for national preparedness? And why not do it now?"

Wants United States to Rule Air.  
Then Rear Admiral Peary buckled down to a review and a strengthening of his plea uttered several days ago for the creation of a real air force. He urged the establishment of a great central plant in the interior of the United States where airplanes could be built, tested, tuned and started for the battlefields. The United States should, he said, become the first air power in the world.

The Explorer's statements were listened to with great interest so long as he dealt with the problem of making America great in the air. He then turned to the subject of the creation of a special department of aeronautics and the interest began to flag. The statements of the steel institute, which went into executive session, were not listened to with the same interest.

Fixed Prices Himself.  
The steel institute asked Secretary Baker to call together the steel manufacturers for patriotic or other motives agreed to the price of 2.9 cents a pound or whether he had forced them to accept that price. Mr. Daniels said it was clear that he and not the steel institute had stipulated that price. "It gives them a very good profit," he added. This would seem to be in conflict with the statements of the steel institute, which named 3.5 cents as a fair price.

The filling of Government orders at 2.9 cents a pound is a financial hardship involving millions of dollars loss from market prices to the steel companies is not disputed. The steel institute came forward early in the war with a willingness to sacrifice market price profits for the Government's benefit.

INDIA RESTRICTS ANNIE BESANT

## DENMAN ASKS WILSON TO ACT IN SHIP MUDDLE

President Will Decide This Week Between Chairman and Goethals.

STEEL PRICE MADE \$56

Contracts Are Let for Ten Ships With This Tentative Quotation.

WASHINGTON, June 18.—The long standing controversy between Chairman Denman of the United States Shipping Board and Major Gen. George W. Goethals over the question of authority in the Administration shipbuilding programme reached such an acute stage today that official Washington freely predicted that one or the other of them would resign within a few days.

The probability of this was emphasized and the breach between them further evidenced by the action of Mr. Denman today in signing the contracts for ten steel vessels after he had obtained a tentative price of \$56 a ton for steel plates. He previously had refused to sign these contracts, sent to him by Gen. Goethals as head of the Emergency Fleet Corporation, because Gen. Goethals had fixed \$55 a ton as the price of steel.

The slight likelihood of the quarrel being settled was indicated today by the fact that both Mr. Denman and Gen. Goethals, abandoning all attempts to get together and adjust their differences, brought the affair officially to the attention of President Wilson. Both sought appointments with the President to discuss the shipping situation. Mr. Denman succeeded, while Gen. Goethals failed. The President's decision was filed for the rest of the day. It is understood that Gen. Goethals will place his side of the quarrel before the President later in the week.

Dispute Over Powers.  
It is understood that Mr. Denman and Gen. Goethals, but the principal point of concern to the chairman of the board was as to whom it was to be delegated the duty of obtaining the necessary permission for American citizens to make the journey for the Stockholm conference.

The two Russians and one Russian American representing the American Societies arrived in Stockholm yesterday. The trip includes Mr. Max Goldfarb, editor of the New York Forward, a Socialist leader from Buffalo and for thirty years an American citizen, and D. Davidovitch of New York.

Goldfarb and Davidovitch and possibly Reinstein obtained their passports from the Russian Consul in New York. The trip includes Mr. Max Goldfarb, editor of the New York Forward, a Socialist leader from Buffalo and for thirty years an American citizen, and D. Davidovitch of New York.

These men will act in the preliminary Stockholm peace conferences and in the general conference convening July 10. Meanwhile they will be engaged in the task of obtaining the necessary permission for American citizens to make the journey for the Stockholm conference.

Parties They Represent.
